

# SCOTT'S EMULSION

## PURE COD LIVER OIL, WITH

### HYPOPHOSPHITES OF LIME AND SODA.

PERFECT. PERMANENT. PALATABLE.

It is in the form of a beautiful Creamy Emulsion, palatable as Milk and can be taken by the most delicate invalid.

## THE GREATEST REMEDY IN EXISTENCE.

Scott's Emulsion is both a Food and a Medicine, and can safely be said to be a reliable remedy for

Consumption, Bronchitis, Scrofulous Affections,  
 Anæmia, General Debility,  
 Coughs, Colds and Throat Diseases.

In all cases where there is **Emaciation or Wasting Away** of the body, nothing will so quickly restore its feeble powers and give flesh and strength as this palatable Emulsion. It is different in its combination and action from any similar preparation, does not separate or change, and is at least three times as efficacious as plain cod liver oil. It is no idle boast to say that this remedy is without a peer. Be sure and obtain **Scott's Emulsion**, put up in a salmon wrapper at 50cts and \$1.00 per bottle, by

SCOTT & BOWNE, Manuf'g Chemists, New York, and Belleville, Ont.

# L. W. YEOMANS & Co.,

—IMPORTERS AND DEALERS IN—

DRUGS, DYE STUFFS,  
 PERFUMES, VARNISHES,  
 TOILET GOODS, WINDOW GLASS,  
 PORTLAND CEMENT.

With a large and carefully selected Stock and a thoroughly equipt premises we can fill orders with promptness and satisfaction. Purchasing with cash and keeping well posted in the markets, we are in a position to offer our customers every advantage.

## COAL OIL!

American Water White. American Prime White. Canadian Refined.

Our American Water White Oil has proved most satisfactory; we regard it the Best Oil for family purposes in the market. A full assortment of

## READY MIXED PAINTS

In fifty different shades. These are made with pure linseed oil and the best colors and may be relied upon.

## ARTIST'S MATERIALS,

Tube Paints, Brushes, Canvas, Studies in great Variety. Artist's will find our Stock in these Goods particularly fine.

# COUNTY OF HASTINGS.

---

## ITS SITUATION.

A Directory of the County of Hastings would not be complete without a description of the location of the County, its manufacturing resources, its mineral wealth, character of its soil, its convenience to the markets of the world, and other matters of interest, in addition to the mere alphabetical list of residents. The County of Hastings, which for population and wealth stands amongst the foremost in the Province of Ontario, is situated on the north shore of the Bay of Quinte, has a frontage on the Bay of about thirty miles, and extends to within five miles of the head of said waters. It comprises within its limits twenty-four townships, a city, two towns, and many growing and prosperous villages. The towns of Trenton and Deseronto, the townships of Sidney, Thurlow and Tyendinaga, and the City of Belleville lie immediately adjacent to and fronting the Bay of Quinte; Rawdon, Huntingdon and Hungerford are immediately in their rear; Marmora, Madoc and Elzevir to the north, and Lake, Tudor, Grimsthorpe *et al*, are to the north of these. Belleville is the County seat. Here all the County buildings are located. During the last few years a number of new townships have been laid out, which will be observed by reference to the map accompanying this work. Many of these have been thickly settled and have been formed into thriving and growing municipalities. Through the latter a public road known as "The Hastings Road," has been opened by the Provincial Government, and free grants of land are made to those who desire to go in and settle the country. By the British North America Act, the County was divided into three Ridings for electoral purposes. The East Riding consists of the town of Deseronto, the townships of Thurlow, Tyendinaga and Hungerford; the West Riding comprises the Township of Sidney Town of Trenton and City of Belleville; the North Riding takes in all the townships and municipalities north belonging to the County.

## TRAVEL.

The County of Hastings offers unsurpassed facilities for travel. In addition to the lines of railway which cross it in various directions, and which are noticed below, there are no less than 365 miles of gravelled roads within its boundaries, all of which are kept in excellent condition, and on the whole extent of which no toll-house lifts its

head, or stretches out its arms to bar the traveller's way by day or night. Previous to 1860, besides the roads which had been built by the County, there were several pieces of road, mostly connecting links, varying in length from eleven to two miles, which had been constructed by and were the property of private companies, upon all of which, as well as upon the portions belonging to the corporation, toll-gates were placed and tolls collected.

In the year, 1860 the late George Benjamin, Esq., then Warden of the County, conceived the idea of making the roads of the corporation free of toll, and as that would only be a partial relief if tolls still continued to be collected on the "company" roads, he laid before the Council, at the March session, a scheme for the purchase of those portions of road which were owned by private companies. This scheme was approved by the Council, and a by-law passed, authorizing the Warden and Treasurer to borrow on the credit of the County the sum of sixty thousand dollars, in addition to twenty thousand previously borrowed, for the purchase of said "company" roads. In pursuance of this scheme the roads in question, about forty-six miles in all, were purchased for the sum of seventy-seven thousand eight hundred dollars (\$77,800.00.) This amount was raised by the issue of debentures having twenty years to run, and bearing interest at the rate of six per centum per annum.

For some time after the purchase the repairs and maintenance of the roads were done by contract, the roads being divided into sections for that purpose ; but this plan not being found to work satisfactorily, in 1868, under the wardenship of A. F. Wood, Esq., the management of the roads was vested in a committee of Council and entrusted to the County Surveyor and two foremen, each of whom had a district assigned to him and a gang of men under him.

This system was continued until 1872, when another officer was appointed under the designation of the "Superintendent of Gravel Roads," who is charged with the management of the gravel roads and small or flat bridges, under the directions of the Gravel Road Committee, leaving the large bridges under the care of the County Surveyor under the Bridges Committee.

Previous to 1885 the bridges of the County were kept in order by the County Surveyor under the control of the Warden ; but in that year a committee, entitled the "Bridges Committee," was constituted by by-law, who should superintend the maintenance of the bridges in the same manner as the Gravel Roads Committee does the roads. Upon the recommendation of that Committee the Council determined to discontinue the building of wooden bridges and to replace them as worn out by more permanent structures of stone and iron, at least on the most frequented roads, as fast as the financial state of

the corporation would allow. In pursuance of this resolution two bridges of stone have been built, one over Jones' Creek, on the front of Sidney, and another in the Village of Madoc. Iron bridges have been erected at Stirling, Foxborough, Frankford and Shannonville, and one of steel, with stone piers and abutments, is now in process of building over Crow River, at the Village of Marmora. All these new works, the cost of which amounts to about \$13,500, besides the repairing and rebuilding of wooden bridges, have been done within four years out of the annual appropriations placed at the disposal of the Bridges Committee, which, with those of the Gravel Roads Committee, are as follows :

FOR BRIDGES.				FOR GRAVEL ROADS.			
Year	1885	- - -	\$ 7,700 00	Year	1885	- - -	\$12,000 00
"	1886	- - -	8,000 00	"	1886	- - -	12,500 00
"	1887	- - -	10,000 00	"	1887	- - -	13,000 00
"	1888	- - -	9,500 00	"	1888	- - -	12,700 00
<hr/>				<hr/>			
\$35,200 00				\$50,200 00			

Making a total of \$85,400 00.

This sum covers the maintenance of 365 miles of gravel roads and 224 bridges, besides at least an equal number of culverts, and in addition an average annual sum of \$5,000 has been granted to the minor municipalities for the repairs of roads, other than gravel roads, and from \$1,000 to \$1,500 for township bridges.

The County of Hastings is now traversed by six railways, namely : The Grand Trunk, the main line of which passes through the front portions of the townships of Tyendinaga, Thurlow and Sidney from east to west, and by which connection is made with the Deseronto railway—a short line of a little over three miles in length, which runs from the Town of Deseronto to a junction with the through line of the Grand Trunk ; at Belleville, with its two branch lines, the Grand Junction, and Belleville and North Hastings, the former traversing the townships of Thurlow, Sidney, and Rawdon, passing through Stirling, Campbellford, and other villages to a junction with the Midland at Peterborough, by which Toronto on the one hand and the Sault St. Marie on the other will be reached when the line to the latter point has been completed, as it will be within two or three years. The Belleville and North Hastings connects Belleville with Madoc. This line uses the same track as the Grand Junction to the junction in Sidney, whence it runs through the townships of Huntingdon and Madoc to the vicinity of the village of El Dorado, where a junction is effected with the Central Ontario Railway. Madoc Village is, however, the present terminus of the road, as owing

to the failure of the Grand Trunk and Central Ontario Railway companies to agree upon terms for an interchange of traffic, the line north of the village of Madoc is not in operation. The Central Ontario Railway extends from Picton, in the adjoining County of Prince Edward, through the town of Trenton, where it crosses the Grand Trunk, up the valley of the Trent, through Sidney, Rawdon, Marmora, Madoc, Tudor and Wollaston, to its terminus at Coe Hill, in the latter township. The Canada Pacific Railway's main line from Toronto to Ottawa crosses the townships of Hungerford—passing through the village of Tweed—Huntingdon and Rawdon. Some years ago the line of the proposed Ontario and Quebec Railway was extended from Madoc village to and for some distance beyond the village of Bridgewater, to which place the rails were laid, but the line has not been operated for a length of time. It will thus be seen that the County of Hastings is well served with railroads; but still another line which would be of great public advantage has been chartered, namely, the Belleville and Bancroft Railway, a line which would run up the valley of the Moira *via* Tweed, Bridgewater, Queensboro, Bannockburn, thence to Coe Hill and Bancroft. Its construction in the near future is highly probable. Stages also run daily, connecting with all the principal villages in the northern part of the County, and to Picton during the season when navigation is closed. The County has access by railway and water to the Eastern and Western markets, both of the United States and the Dominion. The Navigation of the Bay is convenient and secure and free from those dangers to which vessels on the lakes are liable. By means of the Murray Canal, which is being constructed by the Dominion Government, direct communication with the West by water will be afforded. This work is situated at the head of the Bay of Quinte, and extends from the channel, across the isthmus of Murray to Presqu'île Bay, on Lake Ontario, a natural harbor and the future western terminus of river navigation. This, the "Harbor of Refuge" of the north-east shore of the lake, lies near the village of Brighton, about 75 miles west of Kingston, and within 120 miles of Port Dalhousie, the entrance to the Welland Canal. The canal is practically an artificial "strait," or channel without locks, and is crossed by one railway and three highway bridges. The width of the canal across the isthmus is 80 feet on bottom, and that of the entrances thereto 200 feet, with a depth at ordinary low water (or zero of the Toronto harbor gauge) of 12 feet 6 inches, fully one foot below the level of the "Telegraph" and other shoals in the Bay of Quinte. The contract was let in August, 1882, and the work will be completed next year. The cost of construction will not fall much short of \$2,000,000. By the construction of this canal the dangerous navigation along the coast of Prince Edward will be avoided, ports of the United States west of Charlotte will be brought one hundred miles nearer to Belleville and Trenton, and the through

route to the east shortened materially. Another canal in which the County of Hastings has some interest is the Trent Valley Canal, of which a considerable portion has been constructed by the Dominion Government. This system of navigation is composed of a chain of lakes extending from Trenton, at the mouth of the Trent, on the Bay of Quinte, to Lake Huron, a total distance of 235 miles, of which 155 miles are navigable for vessels of light draught. Some works are in the valley of the Trent within this County. A Commission, appointed by the Government, is at present examining the route and taking evidence as to the desirability of completing the work. All kinds of steamers and vessels ply regularly between Trenton, Belleville and Montreal, Belleville and Kingston, Belleville and Picton, Belleville and Napanee, and Belleville and Oswego, thereby affording a frequent, cheap and comfortable means of conveyance for the purposes of travel and commerce.

### ITS MANUFACTURING RESOURCES.

Few counties in Canada possess such splendid water-power privileges as those of Hastings. Three large and rapid streams pursue their winding course throughout the County, fed by numerous tributaries, furnishing at a thousand different points splendid mill sites, and an ample supply of water to drive any description of machinery. These streams take their rise from 75 to 100 miles to the north. The largest stream is the Trent, situated in the western section of the County, and possesses by far the best privileges for driving machinery. The Trent is a rapid stream, and in many places broad and deep. The Salmon, running through the eastern section of the County, empties into the Bay at Shannonville. It is a fine stream, and furnishes a large number of flourishing saw and flouring mills with motive power. The River Moira empties into the Bay at Belleville, and for sites for mills and factories, and for machinery of every description, presents unrivalled advantages if properly utilized. For thirty miles back flouring and saw mills are erected at different points on the river; and at Belleville we have mills and factories of various kinds, supplied by water power from this river. These factories might be increased manyfold without affecting the supply of water, excepting for a short period during the summer, but this inconvenience, which is now common to many streams in Canada, might be obviated by erecting storage dams at convenient points up stream. Hundreds of thousands of logs, posts, ties and other timber are every spring brought down these rivers from the extensive lumbering districts, 50 to 100 miles back, and manufactured into lumber, shingles, &c., at the extensive mills at Belleville, Trenton, Rossmore, Deseronto and Shannonville.

## ITS MINERAL WEALTH.

The mineral products of North Hastings are varied and extensive enough to entitle it to the name of a mining district, and to justify the belief that it will in time contribute largely to the resources and wealth of the country.

## GOLD.

For several years previous to 1861 the existence of gold in the Laurentian and Huronian rocks of the County of Hastings had been known to the Director and officials of the Geological Survey, but successive governments, finding reason from such assays as had been made to doubt of its presence in remunerative quantity, and fearing lest the publication of the fact might bring an irruption of an undesirable class of persons into the Province, and induce a number of the settlers to abandon the safer and more certain pursuit of agriculture for the more precarious and illusive occupation of prospecting and mining, directed the officers of the Survey to refrain from announcing the fact, and the efforts of those persons who made mining their object were directed towards the search for iron and copper.

In 1867, however, the discovery of a deposit of gold, of exceptional richness on the farm of Mr. John Richardson, on lot eighteen in the fifth concession of the township of Madoc, broke the well-meant caution of the Government, and gave rise to the excitement which they had feared and endeavored to avoid. Hundreds of speculators, prospectors, practical miners and assayers rushed into the County, and almost every lot in the middle tiers of townships was searched for gold. Shafts were sunk, assays, not always honest, were made and the usual rascalities of a mining boom were freely perpetrated. Companies were formed, bonds were issued, stock was floated, reduction mills were built, and the excitement continued with fluctuating intensity for some two years. In the meantime the original "pocket" of the Richardson mine was exhausted and the miners failed to find the expected vein. This failure, along with the exposure of several "wild cat" schemes, and the small proportion of the gold in other cases threw such a damper over the district that most of the prospectors and speculators left for other scenes and "pastures new," and the pursuit of gold mining in Hastings seemed to be in a fair way to be abandoned, but the determined perseverance of Mr. W. W. Dean, of Belleville, and Dr. Williams, of Matilda, on lot 7 in the 9th concession of the township of Marmora, and the enterprise of Mr. W. J. Gatling, who got possession of a mine on the N. E. quarter of lot 9 in the 8th concession of Marmora, kept the interest in the district alive, though in a feeble state. These mines, though unquestionably capable of being profitably worked, having been laid in, gold mining in Hastings has been for the last sixteen years only fitfully and intermittently carried on. There are a few mines in the County of

apparently proved value, such as the Gatling (now the Consolidated,) the Dean & Williams (or Cook,) the old Feigel mine in Marmora, and the Barry mine, in the Township of Elzevir; besides which good "shews" of gold have been found in other quarters, as on Col. Jas. Brown's property near Bannockburn, and from a newly discovered vein in the Allen Settlement, but on most of these work has been discontinued, either from want of capital, dissensions among the proprietors, disputes as to title, or the selfish policy of the owners, who will neither work the mines themselves, nor allow them to be worked by others on reasonable terms.

#### SILVER.

This metal has not hitherto been found in any abundance in this district. What little has been got is in alloy with the gold in small proportions, and with the lead of our galenas. Assays of the last have given various results of from absolute barrenness to 80 ounces of silver to the ton of lead; but the average is not more than three to four ounces to the ton.

#### COPPER.

Specimens of copper pyrites are met with in many localities throughout the northern townships, and samples of "peacock" and horse-flesh ores have been found in several places, but no veins have been found to warrant the expense of erecting a reduction works.

#### LEAD.

The sulphide of this metal, known as galena, exists in many localities within the County, but little has been done to utilize the deposits, which are not in general heavy in any one place. A gentleman of Madoc, however, at present contemplates the erection of smelting works on a moderate scale, which he thinks may be furnished with sufficient material by the farmers on whose properties the ore exists.

#### OTHER METALS.

Specimens of Bismuth, Antimony and Molybdenum have been found. The only one of these on which mining has been attempted is the first mentioned, but the enterprise was not a successful one.

#### IRON.

This, the most valuable of all the minerals in this district, exists in considerable deposits in many, if not all, of the townships north of the Trentonian formation. The quality of the ores is very high, and but little material of a deleterious nature is found amongst them. In process of time there can be no doubt that the fine deposits in

Hastings will be worked extensively, as some of them have already been in a fitful manner, and that in them will be found one of our main sources of natural wealth.

#### MARBLE, ETC.

Marble—white, black and of various colors—is largely distributed over the townships of Elzevir, Madoc and Hungerford. The quality is excellent, as the stone will resist the action of the weather almost as well as granite.

Mica, actinolite, asbestos, lithographic stone, slate, etc., are also found in the same district, and will in time form a considerable source of wealth.

### FLORA OF HASTINGS.

Amongst the most valuable productions of this County are its forest trees, which include the white pine, sugar maple, red pine, white spruce, hemlock, white cedar, balsam, black spruce, red cedar, six species of oak, three species of elm, three species of ash, three kinds of birch, beech, basswood, hickory, bitter nut, butter nut, balm of Gilead, black cherry, and soft maple. In all we have some forty species of forest trees, amongst which, the above enumeration shows, the most useful and valuable are included. These, we may add, still exist in large quantities, although the axe of the lumberman and the farmer has greatly thinned them.

Considerable lumbering is still carried on in these parts, but it is receding to the north, north-east and north-west.

This whole section is admirably adapted for agriculture in all its branches, fruit growing, stock raising, dairying purposes and cheese making, which latter industry has, under the co-operative system, grown into enormous proportions within a few years, there being upwards of forty cheese factories in the County, the product of which exported in 1887 was valued at about \$600,000.

The number of acres of land occupied in the County of Hastings in 1887 was 961,288, of which 894,073 were resident and 67,215 non-resident, and the number of acres under crop was 207,178. The total valuation of land was \$15,912,536, of farm buildings, \$4,889,315, of farm implements, \$1,470,722, and of live stock, \$2,710,919. Total value of farm property, \$24,983,492.

A number of townships in the northern part of the County have been set apart for granting free to settlers, and are being steadily taken up, which is the best test of the value of the lands. The Hastings road, running from Madoc village north, is the principal thoroughfare into the free grant townships.

## FINANCIAL POSITION.

This resume of the resources and capabilities of the County of Hastings would not be complete without a statement of its financial position, which, in brief, is as follows: Rate of taxation for County purposes,  $4\frac{1}{2}$  mills on the dollar.

Gross liabilities.....	\$116,953 13
Assets available.....	88,602 81
Net liabilities.....	<u>\$28,350 32</u>

Besides the available assets, the County has fixed assets as follows :

324 miles of gravel roads.....	\$486,000
220 bridges.....	110,000
County property in Belleville, including Court house, Gaol, Shire hall, gaoler's house, and Registry office.....	60,000
	<u>\$656,000</u>

Showing a surplus of \$627,650 of assets over liabilities.

Since the year 1880 the County has paid debentures for purchase of toll roads ....	\$57,800
Debentures for consolidation of debt....	89,600
Total.....	<u>\$147,400</u>

# THE CITY OF BELLEVILLE.

---

## HISTORICAL.

One hundred years ago the site of the City of Belleville was in a state of nature. It was not until 1787 that what was then designated the "Ninth Town"—not known as the Township of Thurlow—was surveyed by Louis Kotte, a Surveyor in the employment of the Crown Lands Department, who had been engaged in the survey of several of the other townships bordering upon the Bay. It appears by the original map that lot No. 4, 1st concession of Thurlow, was reserved for an Indian burying ground, and it was upon this lot that the site of the village was subsequently laid out by Surveyor Wilmot in 1816. Settlement for some years was very slow, the Townships of Sidney and Thurlow forming the western limit of colonization. Capt. John Singleton and Lieutenant Ferguson were the first settlers in the new Township, their location being made soon after the survey was completed on lot No. 6, afterwards owned by John Canniff, sen., and subsequently by Shubael Foster, which is now included within the limits of the city. Neither of these gallant pioneers survived long, however, as it is recorded that Singleton died in 1789, and Ferguson followed him to the grave three months afterwards. In the spring of the same year a party of fifty refugee loyalists settled in Sidney and Thurlow, and the following year John Taylor, one of the party, who had settled up the river in the 5th concession, came to live near the mouth of the river, on lot No. 5, now the most important part of the city. Capt. John W. Meyers, having purchased from Mr. Taylor the north half (more or less) of his lot for \$100, in 1790, erected a dam on the site of which is now known as Bleecker's or Meyers' dam, where he built a mill, the only one between Port Hope and Napanee, and in 1794 constructed the famous old brick house which, until 1876, stood on the northern brow of the hill, and was the oldest brick house in the Province. Up to the commencement of the present century but little progress was made by the embryo village, and this is not to be wondered at, as near the mouth of the river was a barren plain, with a heavy cedar swamp extending on each side of it. What is now Front Street, one of the finest streets in Canada, was a thick cedar swamp, with the rock within a few inches of the surface. Soon afterwards a few houses were erected south of Dundas Street, and for many years settlement did not extend north of that street. Probably the first person to build a house in

Belleville was Asa Wallbridge, and in 1798 John Simpson built the first tavern in Thurlow, which stood on the south-east corner of Dundas and Front streets. At this place was the ferry, and subsequently the first bridge. About six years later the site of the bridge was transferred to the spot now occupied by the lower bridge.

At the time last spoken of, and until 1816, Belleville was known as "Meyers' Creek," so called in honor of Capt. Meyers, the mill-owner. The Indian name of the river was Sagon-aska, and it had also borne the name of Singleton's River. In the year mentioned, according to a disputed statement, Governor Gore named the village Bellville, in honor of his wife, Lady Bella, which name has subsequently been transmogrified, by the addition of a single letter, into that which it now bears.

This year Mr. Wilmot, acting under instructions from the Government, laid out the Indian reserve on lot No. 4 into town lots of half an acre each. In this year, also, a post office was established in Belleville, and Mr. S. McNab was the first Postmaster.

The growth of the place is shown by the gradual increase of population, which was, according to Talbot, about 150 in 1818; in 1824 about 500; in 1829 about 700; and in 1836 about 1,700.

In 1836 Belleville set up as an independent municipality, when the first Board of Police was organized, the members composing which were: For the first ward, William McCarty and Asa Yeomans; for the second ward, Zenas Dafoe and Wm. Connor. Billa Flint, jr, (now Hon. Billa Flint,) was by the people at large elected the fifth member, and the Board also chose him President by a vote of 3 to 2, Zenas Dafoe being the opposing candidate. The late Geo. Benjamin was chosen Clerk to the Board. In 1838 the Court House and Gaol were completed, the contractors for which were Robert Matthews and David Duff, of Kingston, the contract price for the building being \$23,640,

The first quarter sessions was held in the Court House in 1839, when Benjamin Dougall presided; Edmund Murney, Clerk of the Peace; J. W. D. Moodie, Sheriff.

After several years of slow but substantial progress, Belleville was incorporated as a Town in 1850, the members elected to serve in the Council for that year being: Samson Ward, C. O. Benson, F. McAnnany and Jacob Bonter; Ketcheson Ward—B. F. Davy, Dr. R. Holden and Samuel Stevens; Baldwin Ward—Jonathan McCurdy, John Coulter and Edward P. Bosely; Coleman Ward—R. F. Coleman, Burleigh Hunt and John Donoghue. M. Sawyer was Town Clerk. At this time the Council elected the Mayor, and Benjamin

F. Davy was chosen the first Mayor of the Town of Belleville, by 8 votes to 3, cast for Francis McAnnany. This was a great step in advance, and Belleville was at this time no doubt considered a thriving and prosperous place. Still, judging by the unerring financial standard, it could not have been much compared to the Belleville of to-day, as the amount of the Collector's roll for collection in 1849 was only £749, 17s. 6d, or in round numbers, \$3,000. To illustrate the progress of the municipality we may state that in 1860 the assessed value of the town was \$1,584,320; in 1870, \$1,669,776, in 1879, \$3,731,674, and in 1888, \$3,906,207, as revised by the Court of Revision.

From 1850 onwards Belleville made more rapid progress, one incentive to which was the improvement in the means of transit afforded by the construction of gravel roads throughout the County, the credit for the establishment of which was largely due to the late George Benjamin, and in 1859 another beneficial idea of the same gentleman was carried into effect, namely, the removal of tolls from the roads, which has proved of great advantage to the people of both Town and County.

In 1850 occurred another important event in the history of the place, namely, the separation from the County, which has also had a beneficial effect. In 1861 the population of Belleville was shown by the census to be 6,277. Progress was still the watch-word, and by 1871 the census showed 7,305 residents of the Town. The census of 1881 stated the population at 9,516. It may be said that the limits of the corporation have been extended several times, the 200 acres on which the village was founded in 1816 having gradually expanded to 1,360 acres, embraced within the City limits in 1879.

---

## THE CHURCHES.

The first church in Belleville was built by the Methodists in 1817, and in 1819-20 the Church of England denomination followed. At the present time Belleville has within her limits 15 churches, some of them amongst the largest and most elegant in the country. These are: Church of England 5; Methodist 5; Presbyterian 2; Roman Catholic 1; Baptist 1; Congregational 1.

---

## EDUCATIONAL.

The educational facilities of the city are excellent. The schools include a High School, a Central School and five Public Schools, in

addition to which there are a Roman Catholic Separate School, a Girls' School conducted by the Sisters of Loretto, and several lesser educational institutions of a private character.

Belleville is also the seat of Albert College, which includes Alexandra Ladies' College. This institution was established in 1857 and is now highly prosperous and in a very efficient condition.

The Ontario Institution for the Deaf and Dumb, which the Government of Ontario established here in 1870, has proved most successful. The institution now stands fourth in point of importance on the continent, the attendance averaging about 240.

Another highly important educational institution in Belleville is the Ontario Business College. From very small beginnings this Institution has grown until it has attained the proud distinction of being the most largely attended of the numerous Business Schools in Canada.

## TRADE AND MANUFACTURES.

Favorably situated, as elsewhere stated, in all respects, Belleville has long been an important centre of trade, the increase in which can be seen at a glance from the following brief statement for periods ten years apart :

EXPORTS.	IMPORTS.	DUTY.
1858—\$592,239	\$169,428	\$15,015 57
1868 532,129	150,182	21,485 88
1878 670,061	241,100	32,758 92
1888 825,672	308,087	56,045 30

Although nature has given to Belleville a site favorable for the establishment of manufacturing industries, yet those advantages have not been utilized as fully as might reasonably have been expected. There are, however, a considerable number of manufacturing industries in the city, the most prominent of which are Tickell's furniture manufactory, the Ashley Carriage Company's works and the Brown and Walker foundries. The largest employers of labor in Belleville are the Grand Trunk Railway Company, who here furnish employment to considerably more than two hundred men.

---

THE WATER WORKS.

The water works system, which was completed in January, 1888, is one of the most complete and perfect in the country. The pipes, which range in diameter from 16 inches, to 6 inches, cover 15½ miles of streets, whilst 165 hydrants furnish a protection for fire purposes so satisfactory that the rates of insurance have been largely lowered in consequence. The supply of water, which is of excellent quality, is drawn from the Bay of Quinte by two Worthington steam pumps, the united capacity of which is 2,000,000 gallons per day. The works are the property of Messrs. Moffitt, Hodgkin & Clark, of Watertown, New York, and their total cost was about \$250,000. Mr. George H. Pope is the local manager.

For fire protection purposes the city has an excellent steam fire engine in addition to the water works, and a highly efficient paid fire brigade.

---

## MISCELLANEOUS INFORMATION.

Belleville was incorporated as a city in 1877, and is governed by a Mayor and twenty-one Aldermen. The city is divided into seven wards and its area is 1,360 acres.

As a place of residence, Belleville is most attractive. It has a beautiful situation in the valley through which the Moira flows, and on the hills which rise abruptly on either side of the stream, whilst to the south is the Bay of Quinte—a paradise for the angler, the yachtsman and the oarsman. Front Street, the principal business street, Pinnacle and Mill streets lie in the valley on the east side of the river, whilst on the flat on the west side are Coleman, Water and a number of other less important streets. On the eastern and western hills are the residences of the great majority of the business and professional men of the place. The streets are all bordered with shade trees, which in summer give them a cool and pleasant appearance, whilst the many handsome buildings and the well kept lawns show to great advantage.

The market square and market building are not excelled in Ontario, and consequently the house-keeper has ample opportunity for choice, as the supply is generally large.

There are two daily and two weekly newspapers published in Belleville, namely the DAILY INTELLIGENCER and WEEKLY INTELLIGENCER (Conservative,) and the *Daily Ontario* and weekly *Ontario Chronicle* (Reform.)

The city is traversed by a street railway, which extends from the Grand Trunk Railway station to the ferry wharf, a distance of two miles.

The streets are lighted by electric lights, gas lamps and coal oil lamps in some of the outlying districts, but the latter are being rapidly superseded by electric lights.

The Agricultural Show Grounds are worthy of mention. They cover a large area and include a fine main building, and numerous stables and sheds for live stock, besides an extensive show ring and a good track for speeding purposes. They are the property of the Bay of Quinte District Agricultural Association, whose central exhibition, open to the world, is held here annually.

It is probable that ere long Belleville will have permanent communication with the adjoining County of Prince Edward by means of a bridge spanning the Bay of Quinte. The charter was secured, a company formed, a large amount of stock has been subscribed by private individuals and by the corporations of Belleville and Ameliasburg, and the success of the undertaking seems assured.

## BANGOR, WICKLOW AND McCLURE.

The Townships of Bangor, Wicklow and McClure are bounded on the north by the Townships of Sabine, Lyell and Jones, on the east by the Township of Radcliffe, in the County of Renfrew, on the south by Carlow, Monteagle and Herschel, on the west by the Township of Bruton, in the County of Haliburton.

These townships are united for municipal purposes. There are several blocks of good land yet to be taken up. Maynooth is situated on the corners of McClure and Wicklow, joining Monteagle and Herschel, formerly known as Doyle's Corners, where there are four stores, two blacksmith shops, one carpenter shop, and two houses of public entertainment. One Catholic Church and one Presbyterian Church. There is also a grist mill and saw mill.

NOTE.—The Post Office Address of each resident is given, and is the last word in each line, "Purdy" being the post office of Allan, John, sen., "Combermere" being the post office of Bennett, Richard, &c.

## BRIDGEWATER.

This village is situated in the township of Elzevir, about four miles from the village of Tweed, and twenty-eight miles distant from Belleville. It is pleasantly located on the Scootamata River, a deep, narrow stream, one of the tributaries of the Moira, and which at this place, furnishes one of the most valuable water power privileges in the County.

The village, which was founded by Hon. Billa Flint, is pleasantly situated and is the seat of several industries. Its trade is considerable, and railway communication, which it is likely to have at an early day, will largely increase it.

Amongst the buildings is a magnificent church, built entirely of marble. Among the public buildings is a large school house, built of marble, and well supplied with maps, globes, &c. The public buildings, in their style and architecture, evince remarkably good taste, and neat cottages, with their well cultivated gardens, pleasant lawns and gravelled walks, strike the stranger as evidence of thrift and prosperity. Within the limits of the village, very extensive quarries of white marble exist, and in the immediate vicinity, marble, iron ore, lead, actinolite and other minerals abound

---

The Township of Elzevir is bounded on the north by Grimsthorpe, on the east by Kaladar, on the south by Hungerford, and on the west by Madoc. The River Scottamatta, in the eastern part of the township, Black Creek in the western extremity, and the Little Scoot, more in the centre, tributaries of the Moira, have excellent water-power privileges, and at different points mills and factories have been erected. Bridgewater is the principal village. Queensboro' is a small village in the western extremity, situated on Black Creek. The soil of the township is varied ; in some parts fertile and productive, and in others rocky and mountainous. This township abounds in various kinds of minerals.

---

### ELZEVIR.

---

NOTE.—The Post Office Address of each resident is given, and is the last word in each line, "Bridgewater" being the post office of Akie, Paul, "Queensboro" being the post office of Alexander, John, &c., "f" stands for freeholder, and "h" for householder,

## DESERONTO.

---

The Town of Deseronto, formerly known as the village of Mill Point and later under its Indian name Deseronto, was incorporated as a town on the first Monday of January, 1889, the rapidly growing trade and population of the place having rendered it advisable to take the necessary preliminary steps during the past year. The town is situated on the Bay of Quinte, at the south-east extreme of the County of Hastings, seven miles from Napanee and eighteen miles from Belleville. The town gently slopes to the south and affords a pleasant view of the beautiful scenery of Prince Edward and of Lennox, bordering the Long Reach.

This town has unsurpassed facilities for the carrying trade, both by land and water. It is connected with the Grand Trunk Railway at Deseronto junction by the Bay of Quinte Railway, which is three miles long. The connections by water are the line of boats *Resolute* and *Reliance* to Oswego, N. Y., making connections east, south and west; steamers from Picton to Trenton and return daily; and also a daily steamer between Napanee and Picton and return. There is weekly each way a stop made by the steamer *Alexandria* from Trenton to Montreal. The railroad has its terminus on the dock and within easy reach of the town, and thus it is seen that all transportation is done at a central point, and the facilities for handling freight are complete in every respect.

The population of the town is over 3,200, having increased 50 per cent. in the last three years; the assessment roll of 1888 was \$396,000, having been increased about \$100,000 since the previous year.

The appearance of the town to a stranger is most pleasing, as all its streets are broad and well kept, the roadways are solid and even, and all streets have plank sidewalks. The streets are lighted by gas. The main street, running east and west, is where the principal retail trade is done, and but one block away from that are situated the mammoth manufacturing establishments of the Rathbun Company. The side streets are principally occupied by private dwellings, many of which are of beautiful architectural design, having spacious and well-kept grounds. In the centre of the town, on Main street, is a small, well-kept park, at one side of which is a band stand, where the Rathbun Cornet Band discourse music at intervals during the summer months. The park is the property of the Rathbun Company and kept in order by them.

The churches are the Episcopal, Presbyterian, Methodist and Catholic, all being substantial and commodious structures. The schools of the town are the pride of the inhabitants.

Deseronto is essentially a manufacturing town—a veritable hive of industry, and not a word can be written without a connection is made with the renowned firm of the Rathbun Company, who are the owners of the great manufactories of the town. The Rathbuns came to Canada from Auburn, N. Y., in 1848, and established a saw-mill on the Bay of Quinte and gave it the name of Mill Point (now Deseronto.) They confined their operations mainly to cutting logs on their limits in the country watered by the Trent, Moira, Salmon and Napanee rivers, driving the timber to Mill Point, sawing it there and exporting the lumber from that point to the American market across the lake. But in 1862 Mr. E. W. Rathbun, the present head of the concern, succeeded to the management and from that date and since, aided by his brothers and other able assistants, he has been steadily increasing the industries of the concern until now the products of the forest, almost without waste, are converted into commercial commodities, giving employment to an average of about 3,000 hands. Their operations comprise lumbering, sash, blind and door factory, car works, shipyard and marine railway, flour mill, gas, chemical and charcoal works, brick and terra cotta works, hydraulic cement, railways and steamers, general store, etc., etc. They owned or own the town site, sell lots to their men, aid them to build houses, supply the town with gas, own a number of the steamers and boats on the bay, turn out 230 barrels of flour a day, own and run the Bay of Quinte Railway,  $3\frac{1}{2}$  miles, the Thousand Islands Railway 4 miles, the Napanee and Tamworth  $29\frac{1}{2}$  miles, have splendid docks, shipyards and a number of other independent, or rather apparently independent industries. But as a matter of fact they are all dependent on the original industry of saw-milling, and contribute to the profitable utilization of the forest products and the refuse or waste therefrom. All of the works of the concern are connected by railway, and innumerable switches are seen on all sides, running from one department to another.

The company have their own yards and agencies in the United States and Great Britain and at various points in Canada for the distribution and sale of their various products. Every department is being worked to its full capacity.

Their operations in 1887 in forest products alone aggregated not less than 125,000,000 feet bill, to which their operations north of Toronto, in the Ottawa valley and the intervening country, were all important factors.

The company touch nothing that does not grow right out of their business. They do not cast about them for something new to bring

into their system, as they do to create something new out of what they have already in their hands. Their assistants and workmen are thrifty, and well-to-do, as evidenced by the appearance of their residences, which are largely owned by the employes. The cash system prevails in the company's store and all the other stores of the town.

The enterprise, the energy, the industry of the place are unequalled. As a visitor truly said, "there is nothing like it elsewhere in Ontario."

In the town there are five well-kept hotels, the O'Connor House, Deseronto house, Oriental hotel, Empress house and Cameron's hotel.

The town also boasts of a very ably conducted local weekly newspaper, the *Tribune*.

## HUNGERFORD.

---

This is the largest township in the county, having an area of 109,200 acres of land, the greater part of which is well adapted to agricultural purposes. The township of Hungerford is situated in the east riding of the County of Hastings, and is bounded as follows, that is to say on the north Elzevir, and a portion of Madoc; on the east by Sheffield, in the County of Lennox; on the south by Tyendinaga, and on the west by the township of Huntingdon.

The township of Hungerford was settled principally by Irish and people of Irish descent, together with the descendants, of United Empire Loyalists, who drew land in this and other rear townships. Its progress, since the occupation of Sugar Island by Dirkin & Donohue in 1826, has been rapid, and to-day it occupies a position second to none in the county in its natural resources and productiveness. The surface of the township is somewhat rolling, rendering drainage everywhere practicable. The soil is of a calcareous nature and is well watered.

The Moira River enters the township at its north-west extremity, and flows in a south-easterly direction until it reaches Stoco Lake, leaving the lake by two branches which unite after running parallel to each other or about two miles, thence in a south-westerly direction to the boundary. The characteristics of the Moira in Hungerford are identical with other localities through which it flows, except that the current is not quite so rapid, affording less facilities for mill privileges than in Thurlow.

The Scoutamatta Creek, a stream of considerable size, with its tributaries, flows through the north-east portion of the township.

A tributary of Parks' Creek takes its rise on lot No. 20, in the 6th concession, and flows in a southerly direction towards the Tyendinaga boundary, in which township it forms a connection with the main stream.

Black Creek takes its rise on the north-eastern boundary of the township, and empties in the midst of a large cranberry marsh, into Stoco Lake, and its northern extremity.

Clare River also takes its rise in divisions upon the eastern boundary, and empties itself into Stoco Lake at its eastern extremity.

# THE RATHBUN COMPANY

DESERONTO, - Ontario,

MANUFACTURERS OF ALL KINDS OF

HARD AND SOFT WOOD TIMBER,  
AND LUMBER.

LATH, SHINGLES, RAILWAY TIES,  
TELEGRAPH POLES, FENCE POSTS,

---

**AGENTS FOR STEAMERS**

Reaching all St. Lawrence River Ports to MONTREAL, OSWEGO  
and all BAY of QUINTE PORTS. Agents for The North  
American Telegraph Co., connecting with the Canadian Pacific  
Railway Telegraph Co's. Lines.

There are a large number of well equipped cheese factories located in the vicinity of the many living springs in different parts of the township, and considerable interest is manifested by the farmers in this enterprise. The product of these establishments finds a ready market at Belleville, which has of late become one of the principal cheese centres in the province.

Gold, as well as other minerals, has been discovered in considerable quantities in the eastern part of the township.

The township is now well provided with railway facilities for traffic east and west, as it is crossed by the Canadian Pacific Railway; but railway communication with Belleville is very much desired, as the nearest station on the North Hastings branch of the Midland division of the Grand Trunk is six miles distant from Tweed. If however, projects which are now well in hand, are matured, Hungerford will be gridironed by railways, as those projects include the Belleville and Lake Nipissing Railway, from Belleville northward *via* Tweed, and a branch line from Tamworth, on the Napanee, Tamworth and Quebec Railway to Tweed.

## HUNTINGDON.

Huntington is rectangular in shape and is bounded on the north by the township of Madoc, on the east by Hungerford, on the south by Thurlow, and on the west by Rawdon, and contains within its geographical limits 56,000 acres of land. It was first settled about the year 1816 or 17, for during the latter year it is recorded that there were five permanent settlers in the township, with a total population of twenty-six inhabitants.

The township is well watered by Lake Moira and the Moira River, Rawdon creek and its tributaries, a branch of the Scootamatta, and Boyne creek. Moira Lake, better known as Hog Lake, is one of the largest and finest of the back country chain of fresh water lakes, and is situated in the northern part of the township and on the Moira river. It embraces an area of something over 2,000 acres, and its waters contain a variety of fish indigenous to this section of the country.

The Moira river in Huntingdon is deep, and is in places completely surrounded by impenetrable marshes and swamps. Rawdon creek takes its rise from a small natural lake upon lot No. 12 in the 12th concession, and traverses the township in a south-westerly direction; a tributary of Rawdon creek has its source upon lot No. 4 in the 5th concession, connecting with the main branch at a point upon lot No. 8 in the 4th concession.

The Madoc branch of the Midland railway runs through the township, entering upon lot No. 1 in the 2nd concession, and running in a north-easterly direction through the township, crossing the narrows of Moira lake, thence to Madoc.

The surface of the township is rolling, and in some places hilly, being originally covered with a heavy growth of hardwood timber,

which since the advent of the pioneer settler, has almost entirely disappeared. The soil is similar to that of Hungerford on the east, and Rawdon on the west,—a clay loam mixed with shale, the limestone formation occasionally assuming a degree of prominence which renders it unfit for cultivation.

## MADOC VILLAGE.

The village of Madoc, while its situation renders it the most important village in the North Riding of Hastings, is undoubtedly also one of the most flourishing and progressive villages in the County at the present time. It is situated on Deer Creek, in the Township of Madoc, bordering on Huntingdon, 26 miles north of the City of Belleville, and is the present terminus of the North Hastings branch of the Midland Railway. An excellent County gravel road also connects it with that City, and which extends northward from Madoc to the rear part of the County. It became an incorporated village on the 1st of January, 1878.

Madoc is one of the most prosperous and substantial villages in the County. It is surrounded by an excellent agricultural country, and not only this but it is in close proximity to some of the richest and most extensive mineral beds in the County. In addition to the Belleville and North Hastings Railway, which gives the inhabitants of Madoc regular and easy access to the front, the line of the projected Toronto and Ottawa Railway runs through the village, and there is some prospect of this scheme being carried through.

While it is evident that on the mineral resources of the district depends largely the future of the village, there is no doubt but that in this respect that future will be an auspicious one.

There is no doubt but sooner or later, the Townships comprising the North Riding of Hastings will have to be cut off from the south for municipal and judicial as they are now for parliamentary purposes. The rapid influx of settlers into the northern Townships, and the rapidly increasing population of the whole riding, will, in the course of time, render this step necessary, and that Madoc will be the county town of the new county seems almost beyond doubt.

SOLICITOR FOR THE TRADERS' BANK OF CANADA.

### **MONEY TO LOAN.**

Private and Company Funds to Invest in Real Estate, Chattel  
 Mortgages, &c., &c.

**MADOC, - ONTARIO.**

## MADOC TOWNSHIP.

The township of Madoc is one of the most prosperous and growing municipalities in North Hastings, having been acquiring rapidly in both population and wealth for a number of years past. It is situated almost in the centre of the County, and is bounded on the north by Tudor, on the west by Marmora, on the east by Elzevir, and on the south by Huntingdon. It is said to have derived its name from Lord Madoc, of Wales, and contains about 70,400 acres of land.

The permanent settlement of the Township commenced about the year 1830. Uriah Seymour, Barnabas Vankleek, James O'Hara, sen., Cyrus Riggs, Thomas Allan, J. R. Ketcheson, Levius Empey, Hugh Cooper, William Allen, N. Bristol, J. H. Dunn, Horace Seymour, Hugh McKenzie, William Blair, Hugh Blair, John McCoy, John Moore, Coleman Harris, and others were amongst the earliest settlers. The Township has been brought into more than usual prominence throughout Canada and the United States on account of its rich mineral deposits. Gold, iron, lead, marble and lithographic stone have been found to exist in large quantities within its borders. Aside from its mineral wealth, the soil of most parts of the Township of Madoc is excellent for agricultural purposes, many of the farms being equal to any in the County. Grain, roots and fruit yield abundantly. The farmers are thrifty and prospering, as is evidenced by their well tilled fields, and comfortable and substantial looking dwellings and out-houses.

## MAYO AND CARLOW.

---

Mayo lies South of Carlow, and is bounded on the East by Ashby, on the West by Dungannon, and on the South by Cashel. The soil is pretty much the same as in Carlow. The Timber is principally hardwood, interspersed with considerable patches of pine woods. The general features of the Township are rough and in many places rocky. It contains large portions of excellent cultivable lands, generally rolling, which are being rapidly settled by a good class of settlers.

The Township is well supplied with water from a number of small Creeks. The Little Mississippi River, a branch of the Madawaska, is situate on the east side of the Township and runs northerly through it.

The Mississippi Road enters this Township from the west, about the 10th concession, and runs in an easterly direction across the Township.

"The Carlow and Mayo Road" starts at its junction with the Mississippi Road, on lot No. 12, and runs in a northerly direction through Mayo to the Township of Carlow.

---

## CARLOW.

Carlow is bounded on the North by the Township of Bangor, on the East by the Township of Montegale, on the West by the Township of Raglan, and on the South by the Township of Mayo, and contains 48,308 acres, including water and road allowances.

The soil is principally a rich sandy loam, very fertile. The timber is chiefly hard wood, viz: Maple, Beech, Basswood, &c.

There are considerable portions of rough and rocky lands in this Township, but the greater portion is excellent cultivatable land, and it is characterized as containing the largest quantities of flat land in blocks of any of the Townships in the Northern part of the County, the greater part of which is settled upon by an industrious and thrifty class of settlers, principally Scotch.

## MARMORA AND LAKE.

### MARMORA VILLAGE.

The Village of Marmora is known all over Canada, and in many parts of the Old World, not on account of its size and wealth, but from its connection with the Marmora Iron Works, which were established many years ago. These works were erected at a cost of over \$100,000, and a large amount, estimated at \$300,000, has been expended upon them since. A good deal of iron has been made at Marmora ; and at one time the village presented a busy scene ; but through bad management, and the difficulty of transportation, operations at the mines have been at a stand-still for some years. A few years ago, the Marmora Works, with all the Company's lands, were amalgamated with the Cobourg and Marmora Railway Company. Mining operations were carried on at the ore bed in Belmont for some years, and large quantities of ore have been taken out and conveyed to Cobourg, and from thence shipped to the United States, where it was manufactured. At this point the ore is apparently inexhaustible, and the quality improved the deeper the excavations. The mines and the railway are now the property of T. P. Pearce, Esq.

The Central Ontario Railway has a station at Marmora, which is a growing, enterprising village with many excellent new buildings and several factories.

## MONTEAGLE AND HERSHEL.

These Townships form one Municipality, and are bounded on the north by Wicklow and McClure, on the south by Dungannon and Faraday, on the east by Carlow, and on the west by the township of Harcourt. The soil in both townships is for the most part fertile, capable of producing large crops of all kinds of grain. It is well wooded with Maple, Birch and Pine. There are several lakes of various sizes, which abound with fish, chiefly speckled and grey trout.

## RAWDON.

The township of Rawdon is bounded on the north by the township of Marmora, on the east by Huntingdon, on the south by Sidney, and on the west by the township of Seymour, in the County of Northumberland, and contains within its limits an area of about 67,200 acres of land. It derived its name from Lord Rawdon, a Scottish nobleman, at one time connected with the Colonial Department of the British Government. Its first permanent settlement dates back to about the year 1820, when the front range of concessions were occupied by sons and descendants of United Empire Loyalists, families, who lived in the older settled townships on the Bay of Quinte, and who, on the occupation of the available land in their respective corporations, drew lots in the rear tier of townships, upon which their families afterwards settled. The vicinity of Stirling was, owing to the superior quality of the soil and the close proximity to Sidney, together with the fine water privileges afforded by Rawdon creek, the scenes of the earliest settlement in the township.

The soil, like that of the adjoining townships, is on the blue limestone formation, and, with the exception of sections where the rock crops out to the surface, is excellent for agricultural purposes, and is apparently in a high state of cultivation.

Rawdon is well watered by several rivers, creeks and rivulets, which pursue their tortuous course in a south-westerly direction through the township, affording at different points excellent facilities for almost every description of manufactures. Rawdon creek takes its rise in the township of Huntingdon and upon lot No. 1 in the 9th concession of Rawdon, traversing the township in a south-westerly direction, passing through the village of Stirling, and emptying itself into the river Trent, in the township of Sidney.

A stream of considerable importance takes its rise upon lot No. 9, in the 5th concession, and runs parallel to Rawdon creek, also emptying into the Trent in Sidney.

Squires' creek drains the north and east and west centres of the township. It takes its rise upon lots 6, 8 and 24, in the 6th concession, and upon lot 13 in the 12th concession, with tributaries at the south-western extremity of the township, in which direction it flows until it meets the Trent in the township of Seymour, in the county of Northumberland.

The Moira river, with a tributary called Mud creek, crosses the north-eastern corner of the township. Crow River, a large tributary

of the Trent, traverses the north-western extremity of the township, widening to the proportions of a small lake. The manufacturing interests of Rawdon are confined to grist and saw mills, brick yards and cheese factories.

The Midland Railway runs across the front of the township, the Canada Pacific crosses it, and the Central Ontario skirts its western edge.

## STIRLING.

Stirling is a thriving and prosperous village situated partly in the Township of Rawdon, and partly in the Township of Sidney, but within the electoral division of North Hastings. It was incorporated in the year 1858. Located in the heart of a thickly settled and fine agricultural part of the County, and being possessed of several mills and manufactories, and the Grand Junction Railway running through it, it must become an important town, and a central market for the products of the County.

Stirling is distant from Belleville, 15 miles ; Trenton, 16 miles ; Frankford, 7 miles ; Marmora, 16 miles ; Madoc, 19 miles ; Campbellford, 16 miles.

clearing snow and making perfect roads.

---

SIDNEY.

---

This township is bounded on the north by the Township of Rawdon, on the east by Thurlow and the City of Belleville, on the south by the Bay of Quinte, and on the west by the River Trent and the Township of Murray, in the County of Northumberland, and is one of the best settled and wealthiest townships in the County of Hastings. The first concession of Sidney, from the proximity of the waters of the Bay of Quinte, became of necessity the scene of the earliest settlement. Capt. John Walter Meyers, noted during the revolutionary war for his bravery and enterprise, and whose career, in connection with the same, is related with varying details in Stokes' "American Border Wars," and Dr. Canniff's "History of the Settlement of Upper Canada," together with his family, appears to have been the actual pioneer settler. Capt. Meyers was of Dutch descent, and came from the vicinity of Albany, on the Hudson, in the State of New York, about the close of the war, and settled upon the front of Sidney, where he drew a large grant of land, a short distance east of the present town of Trenton. His enterprise was here auspicious, not only in clearing land for cultivation, but in erecting a grist mill upon a small stream on his land in Sidney, and he thus became a pioneer in mill building as well as trading and sailing batteaux and other craft on the waters of the Bay of Quinte. Traces of this mill near the bay shore can still be seen; and the position of the dam, the mill-race, the foundation of the mill and residence of the late owner still exist; and, what is more especially interesting, there is embedded in the surface soil, but still exhibiting its upper side, the lower mill stone, or bed-stone as it is usually designated. The stream proving, eventually, inadequate for the desired end, he subsequently erected another mill on the present river Moira, on a dam constructed for that purpose, and also a log saw mill on the opposite or east bank of the river.

The Town Hall is situated about the centre of the township, at the post village of Wallbridge, distance from Belleville, 9 miles. It is a good, substantial, commodious building, with ample shed room for the teams of the ratepayers. The township contains about 68,400 acres of excellent land; its surface is somewhat rolling, well watered by several streams, the principal of which is the Trent. The River Trent flows through the western part of the township and empties into the Bay at Trenton. It is spanned by three substantial bridges, one at Trenton, one at Tupperville and the other at Frankford, affording to the farmer on either side an excellent means of passage.

The Trent river was one of the original routes of Indian and French traders, and is of interest from the fact that Champlain is reported to have entered the Bay of Quinte by this means, and discovered Lake Ontario. Its Indian name was *Ganaraske*, and was sometimes called Quintio; millions of feet of squared timber and saw logs have been rafted over its turbulent waters on their way to the great markets of the old world. The Belleville and Stirling, and Belleville, Frankford, and Stirling macadamized roads run through the township. The Central Ontario Railway traverses its western side, and the Grand Junction also passes through a portion of its eastern part, whilst the Grand Trunk traverses its front.

THURLOW.

---

The Township of Thurlow, or ninth town in the U. E. Loyalist, order of Bay numbers, is another of the oldest settled municipalities on the Bay of Quinte. It is bounded on the south by the Bay of Quinte, on the west by the township of Sidney, on the north by Huntingdon, and on the east by Tyendinaga, and is admirably located with reference to railroad and steamboat accommodation and its close proximity to the city of Belleville, advantages the people have not been slow to avail themselves of, as is shown by the increased prosperity of the agriculturists throughout the township. The first pioneers who penetrated the wilds of Thurlow, about the close of the last century, and in the beginning of the present, found interminable forests, a heavy waste of timber, with dense undergrowth, the home of the bear and howling wolf, which were numerous. When the scattered clearings began to admit the sunlight and crops were put in, the people began to realize the fertility of the soil. Productions of every variety indigenous to this latitude were certain of rapid growth and large returns, as attested by the vast wealth that has been drawn from the bosom of the soil during the three quarters of a century that has passed—a wealth that has covered it with beautiful homes, drifted to every part of the world, and fed and clothed millions. The soil is generally a fine quality of calcareous loam, mixed considerably with clay. The limestone formation occasionally crops out in certain sections, particularly on the front, and is destined to be a resource of great value, as the stone is of the best quality and of great thickness. The Grand Trunk Railway Company have extensive quarries near Foxboro, and the quarries at Point Ann have furnished stone for the Murray Canal bridge and are now being worked extensively for material for the St Lawrence canal. The surface of the township is undulating, climate agreeable, and general altitude well adapted to agriculture. It is sufficiently well watered for farming purposes, with abundant springs of pure cool water in every part thereof. The Moira River, with its several tributaries, runs through the township in a south-westerly direction, and empties itself at Belleville into the Bay of Quinte. Large quantities of the finest quality of cheese are annually manufactured within its limits, which commands the highest market price in the markets of the old world, to where it is principally shipped.

The Moira River, named after the Earle of Moira, afterwards Marquis of Hastings, or Sagonaska, its original Indian name, flows through the township, affording some of the finest water privileges

that are to be found in the Province, while large quantities of saw logs are annually rafted from the north woods to the many mills along its banks, and at Belleville, there to be dressed for the market.

There are several small villages in the township, including Canifton, situated upon the river Moira, about four miles from Belleville, and was first settled about the year 1805, by the family of John Canniff, from whom the village derived its name and who was its founder.

Plainfield, a small post village, is situated at a point on the Moira, a short distance above Corby's distillery. Around this flourishing industry a small village has grown up and is named Corbyville. Foxboro, formerly Smithville, is a thriving village which has grown up at the intersection of the Madoc and Stirling roads. Latta's Mills, a small hamlet, is on the river above Plainfield.

The Grand Junction Railway runs north through the township and the Grand Trunk crosses its front.

A portion of the post village of Roslin is situated in the north east corner of the township. There are several stores. Considerable business is done here on account of its being on the principal road to Belleville, 15 miles distant, and the fine agricultural country by which it is surrounded.

## TYENDINAGA.

Tyendinaga is a large new township, fronting on the northern extremity of the so-called "Long Reach," containing within its geographical limits about 92,700 acres of excellent land. It is bounded on the north by the Township of Hungerford; on the east by Richmond, in the County of Lennox; on the south by the Bay of Quinte, and on the west by Thurlow. It was named after and in honor of the celebrated chief of the Sixth Nation Indians, better known by his English appellation, Joseph Brant, who came to Canada with remnants of his tribes about 1793-4, from Lewiston, New York, and located upon the northern shore of a portion of the Bay of Quinte.

The surface of the land is undulating and inclining towards the south-west, rendering drainage every way possible. The soil is similar to that of Thurlow, is of a calcareous nature; occasionally the limestone formation approaches so near the surface as to render the soil difficult for cultivation, and in some places the rock is quite prominent. The land, were not too rocky, is of the greatest fertility, and is second to none in the county in its natural productiveness. All cereals are raised abundantly, also fruit; nowhere in the Province, or perhaps in this latitude, is there better encouragement for the fruit grower,—a soil of peculiar adaptability and a climate modified by the Bay breezes ensure a fair quality of fruit, especially apples. Tyendinaga is of all the townships in the county the best watered, seven parallel streams with their tributaries run through the whole width of the municipality in a south-westerly direction, emptying themselves into the Bay and Moira River. Sucker creek takes its rise in the township of Richmond, in the county of Lennox, and runs through the south-east corner of the Reservation, emptying into the Bay directly south of the Indian Council house. Mud creek also takes its rise in Richmond, and runs parallel with and about two miles from Sucker creek, emptying into Hungary Bay. The Salmon river, a considerable stream running parallel with Mud creek, and upon which are situated the village of Shannonville, Milltown, Lonsdale, and Kingsford, upon the eastern boundary, takes its rise in Crow Lake, township of Kennebec, in the county of Frontenac, and was known by the Indians as the *Gossippa*; upon this river are located flouring and saw mills, factories, &c., and it affords water power for all the requirements of the vicinity. Fisher creek, a tributary of the Salmon river, receives its first supply upon lot No. 21, in the 6th concession of the township, near Read P. O., and empties into the Salmon on lot 23, in the 2nd concession; an unnamed creek also takes its rise immediately south of Read P. O., running in a south-westerly direction, emptying into the Bay upon lots Nos. 15 and 16 in the township of Thurlow. Parker

creek, with its several tributaries, waters the north-west part of the township, and empties itself into the Moira, at Plainfield, in Thurlow. The Moira river also runs across the north-west corner of Tyendinaga, on the northern boundary, near the cheese factory of John White, ex-M.P., a small stream, rising upon lot 27, in the 9th concession, empties into the Moira river, in the township of Hungerford. A portion of Mud Lake, on the eastern boundary, between the 7th and 8th concessions, is also situated in the township of Tyendinaga, which abounds with several species of fresh water fish.

Lonsdale is a small post village, situated on the Salmon River and lot No. 32, in the 2nd concession of the township of Tyendinaga. Considerable business is done at this point, drawn principally from the fine agricultural country by which it is surrounded. The village is growing rapidly, and promises to become one of importance in the township.

Melrose P. O. and village is located upon lot No. 13 in the 3rd concession of Tyendinaga, and is the seat of municipal government. The Town Hall, a most substantial brick building, with every convenience for the accommodation of the council and ratepayers, is situated in the village.

## G. W. OSTROM,

BARRISTER, SOLICITOR IN CHANCERY,

&C., &C.

TRENTON, - - - Ontario.

MONEY TO LOAN AT EASY RATES.

Office in Gross Block, opp. New Post Office.

## TRENTON.

Next to the City of Belleville, the Town of Trenton is the largest and most important place in the County of Hastings. Trenton lies twelve miles west of Belleville, at the mouth of the great river Trent and is on the western border of Hastings, that portion of the town on the east side of the river being in the township of Sidney, and that on the west side (the principal portion) in the township of Murray, County of Northumberland. It is all, however, incorporated in the County of Hastings. Here, in 1790, James Smith, who had been a judge in Schoharie county, New York previous to the American revolutionary crisis, came and took up his abode, pleased to be once more sheltered neath the folds of the Union Jack. In the same year John Bleecker, another U. E. Loyalist, settled on the opposite side of the river from Judge Smith.

Trenton progressed very slowly, but it is now a busy and prosperous place with a population numbering upwards of 5,000, and an assessed valuation of over \$1,000,000.

The Village of Trenton became the Town of Trenton in 1881. In 1882, the boundary was enlarged by act of the Legislature adding 800 acres.

In 1878, the Picton Railway was constructed and in 1879, Manning & Co. sold the Picton branch to the McMullen Bros., who formed a company and constructed the Northern section to Coe Hill, naming it the Central Ontario Railroad

In 1882 the Murray Canal was commenced, connecting Lake Ontario with the Bay of Quinte, and is expected to be finished and opened for traffic in 1889. It is about three miles from Trenton and will greatly benefit its trade with western ports

In 1887 the Dominion Government appropriated money to build a Post Office and Customs House in Trenton, the corner stone of which was laid on the 22nd of June, 1888.

Trenton has one of the finest water powers in Ontario. Just below the Grand Trunk Railway bridge, over the river Trent, a substantial dam was constructed in 1885-6 at a cost of nearly \$50,000. This dam gives a capacity of 10,000 horse power. The supply of water is inexhaustible. The corporation will utilize a portion of the power for water works, and the remainder is to be offered to manufacturers on advantageous terms to locate here and establish various industries. Over the dam is a railway and traffic bridge,

which is in daily use by Gilmour & Co., who run trains to and from their mills to connect with the Grand Trunk and Central Ontario railways. All manufacturers who secure power are entitled to the use of the bridge. The prospects that Trenton will eventually become a considerable manufacturing centre are most encouraging. The geographical location of the town affords many advantages as a distributing point—the early completion of the Murray Canal making it a lake port, the Central Ontario Railway tapping the rich mineral deposits of the north, justifies the citizens in their brilliant forecast of the town's future.

The old covered bridge is a structure of historic interest. It was erected in 1835, and bids fair to last another fifty years, being in a good state of preservation. An iron swing draw was built a few years ago at a cost of about \$10,000.

The harbor is one of the finest on the Bay. The spacious mouth of the River Trent is 1,000 feet wide, and has an average depth of 18 feet, and this volume of water extends up the river nearly to the dam, and with long lines of docks will accommodate a large number of vessels.

Three daily steamers and one weekly steamer ply between Trenton and bay ports and Montreal. The Grand Trunk Ry. and the Central Ontario Ry. connect Trenton with the rest of the world.

---

## TRENTON BRIDGE AND ENGINE WORKS,

—  
ROBERT WEDDELL, PROPRIETOR.  
—

Among the well-known industries of Canada is that of the Trenton Bridge and Engine Works, which are located at Trenton. This business was established here 14 years ago by Mr. Robert Weddell, and from a comparatively small beginning has grown to its present extensive proportions. This has been due in a great measure to the push, energy and ability of the proprietor, as well as to the excellent quality of the work done, which has gained a high reputation throughout the country. The plant located in Trenton consists of a boiler shop, blacksmith shop, foundry, machine shop, engine house and bridge building establishment. The works are fitted up with all the latest and most improved machinery and appliances. The firm manufacture steel and iron bridges of every description, which have been universally adopted by many counties, railroads, municipalities and the Department of Railways and Canals throughout the Dominion. They also manufacture turntables, iron piers and roofs, stationary and marine engines and boilers, dredges, tugs, steamboats, excavators and contractors' supplies of all kinds, while a specialty is made of girder

and structural work. A large staff of skilled practical workmen are employed throughout the year under able and practical management. When the works were burned down in 1875, they were immediately rebuilt on a much larger scale owing to the increasing business, and so it has been from that time forward, improvements and additions have been constantly made. Owing to the excellent position which the Trenton Bridge and Engine Works occupy for shipping facilities, cheap rates enable them to compete successfully with any other concern in Canada. They have the advantage of being on one of the best shipping points on the Grand Trunk Railway and the Canadian Pacific Railway, as well as being at the head of the Bay of Quinte and entrance to the Murray and Trent Valley Canals. The Trenton works are conducted by Mr. Robert Weddell, manager and proprietor, and Mr. J. D. Evans, engineer.

## TWEED.

This village is beautifully situated on the River Moira and Stoco Lake, in the township of Hungerford distant from the City of Belleville 25 miles.

The village was laid out for the late James Jamieson Esquire on lot No. 11 and part of 12 in the 10th concession in the year 1850.

The early settlement of the village is contemporary with that of the surrounding country.

It is possessed of one of the best water power privileges in Ontario, which the building of the Canadian Pacific Railway through the village has helped to develop.

The village possesses one of the finest full roller process flouring mills in the county, with a capacity of 250 barrels, per day, connected with which is an elevator with a capacity of 40,000 bushels, and both are operated by George Easterbrook, Esq., in connection with the mill, and on the same dam is a saw mill owned and operated by the same gentleman. A short line of Railway extends from the C. P. R. to the elevator.

A marked improvement in the business of the village has resulted from the building of the C. P. R. through it. Many new buildings have been erected, all fully occupied. Messrs Vandusen & Houston have a planing mill, sash and blind factory. M. A. McGowan, the genial Deputy Reeve of the Township, has an extensive

carriage factory. He does a fine business and employs a dozen or more hands the year round.

Tweed is the seat of the municipal government for the Township of Hungerford. It is possessed of a fine brick hall, clerk's office, and lock up. A large number of fine brick private residences have recently been erected and the frame buildings painted, which gives it a neat and smart appearance. The thrift and enterprise of the people show substantial prosperity. Its religious and educational welfare is amply provided for. Its churches are St. James' Church of England, Rev. Mr. Forester, Rector; Methodist, Rev. Mr. Limbert; R. C., Rev. Mr. Fleming. Mr. Fleming has in course of construction one of the finest stone churches in this county, which will soon be completed at a cost, we are informed, of \$80,000, situate on the hill west of the village and opposite the Church of England. This may properly be called Church Hill.

# COUNTY OF PRINCE EDWARD.

---

## AMELIASBURGH.

---

The Township of Ameliastburgh is situated in the County of Prince Edward, and is bounded on the north by the Bay of Quinte, on the South by the Township of Hillier, on the east by the Township of Sophiasburgh, and on the west by Lake Ontario. Its proximity to the flourishing City of Belleville has, to a great extent, made the commercial interests of the two places identical. The inhabitants of Ameliastburgh, as well as some of the adjoining townships in Prince Edward, have found it to their advantage to buy their goods and wares of the merchants of Belleville, and in order to accommodate the traffic between the two sections, a bridge from Bushy Island to Ferry Point has been undertaken. There are several villages in the township, the most important being Ameliastburgh, Consecon, Rossmore and Rednerville. Ameliastburgh was settled about the same period as the Township of Sidney, and is one of the oldest settled townships in the Province. The soil is excellent for agricultural purposes.
